TECHNICAL SKILLS

Front-End

- JavaScript including ES6
- ReactJs
- jQuery
- HTML/HTML5
- CSS/CSS3

Databases

- SQL
- MySQL/MSSQL
- MongoDB
- Firebase
- Docker
- Jenkins

Back-End

- Java
- C#/C++
- NodeJS
- Kotlin

Others

- Agile / Scrum Methodology
- RESTful APIs / Azure cloud platforms
- AWS (S3, EC2, IAM)
- DevOps
- UI/UX Design
- Git/GitHub
- Security and defense strategies against SQLI and XSS attacks

PROJECTS

YouTube Search:

I built a YouTube search web application using the YouTube API to search for videos and display them.

Business Website:

I built a business website for a local company.

Coworking Shared Workspace Web App:

I built a commercial grade and secure web application for registrants to share out coworking spaces as for profit ventures. I used the full web development stack: JS and jQuery on the front, Node and Express running the business rules layer, and MySQL on the back. The system includes user authentication, signup, verification, and onboarding and can scale to any realistic load.

JavaScript Quiz:

I have created a single page quiz application with multiple choice question and display the score at the end.

EDUCATION

Software Development Diploma, Bow Valley College - Calgary, AB

April 2020
